Ex. No.: 3a)

Date: 6|2|25

Aim:

To write a Shell script to reverse a given digit using looping statement.

Program:

```
echo "Enter a number:"

read n

rev = 0
while [$n -gt 0]
do
d = 'expr $n %. 10 | bc'
rev = $ echo "$rev*10 + $d"
```

Run the program using the below command

[REC@local host~]$sh indhu.sh

enter number
123
321

Enter a number:

54321

Reversed ~~Reserved~~ Number is 12345

Result:

A shell script program has been executed to reverse a number
